

2018 Greater Worcester Community Health Assessment (CHA) Survey

Dear Community Partners,

Fallon Health, UMass Memorial Health Care and the Central Massachusetts Regional Public Health Alliance would like to invite you to participate in the 2018 Greater Worcester Community Health Assessment (CHA) Survey. A CHA is conducted every three years to help us understand key problems that affect our health and also assesses the strengths of our community. The last CHA was completed in 2015 and it has played a vital role in addressing health needs in our region. In this process, your voice and input is important.

Please help the community that you live, work and/or play in, by completing this short (5 minute) voluntary anonymous survey. In addition, please consider sharing the link to the survey with your networks, constituents or clients. Our goal is to collect a large number of responses, which represent the diversity of our community.

Click the link below to start the survey and kindly forward this message to your listserve(s) so that we are able to get a well-rounded response.
