Please check on your neighbors

Town Manager/Board of Selectmen Office: 508-865-4710

Millbury Police Department: 508-865-3521

Power outage: Call National Grid – 508-860-6000 or 1-800-465-1212

From National Grid:

Before a Storm: Staying storm-ready year-round helps keep you safe if a storm knocks out your power. Making a Storm Kit can help you be prepared. Include the following:

- Extra blankets and firewood.
- A supply of drinking water, along with canned and dried food—and a manual can opener. If you have a baby, keep some ready-to-use formula on hand.
- Extra medication, first aid supplies and essential baby items.
- Working flashlights and a battery-operated radio. Be sure to stock extra batteries.

Keep a corded (traditional analog) telephone or cell phone available. Cordless phones don't work if the power goes out.

If you have a generator, please keep it outside and well ventilated.

If you depend on electrically operated life-sustaining medical devices, make sure that you have notified us by calling 1-800-322-3223.

During a Storm

- When an outage occurs, unplug sensitive appliances such as VCRs, TVs, computers, stereos, air conditioners and microwaves to protect them when your service is restored.
- Leave a light switch on to let you know when the power is back on.

From Verizon:

The following helpful information and Verizon contact numbers will help residents and your municipality deal with telecommunications related issues during this winter season. Verizon's toll free number 1-800-VERIZON (1-800-837-4966) and website www.verizon.com/support may be posted to your Municipal website and public access channels.

The Verizon network is a complex collection of assets, from buildings to transmission facilities to vehicles and people, and Verizon's regional control center is always preparing for adverse weather of the season.

The telecommunications network, like your home, requires power to function properly. If commercial power goes out, backup batteries and generators in Verizon's central switching offices or field facilities keep power flowing so customers' phones ring even when the lights go out.
