**Subject:** Rice Pond Village -- Existing street trees along Rice Road and sight distance at the proposed intersection  
**Attachments:** Looking east toward railroad crossing from new intersection.jpg; Looking west toward South Main Street from new intersection.jpg

Laurie:

Attached are two photos taken yesterday. They were taken from the exact position where the eye of a driver leaving the proposed development will be, 6-7 feet off the edge of the existing pavement in a location directly in front of utility pole #6 at its present location (this pole will be moved).

These photos show that the existing trees along the side of Rice Road will not restrict sight distance of a driver leaving the future development.

I offer these in response to the peer reviewer's question, in comment #11 on page 4 of 10 of his letter, as to whether there is such obstruction.

James
