Subject: Rice Pond Village -- response to questions from Mr. Hunter
Attachments: Response to questions from Charles Hunter of G&W railroad 12-13-2021.pdf; Drainage Report for Rice Pond Village revised 11-8-2021.pdf

Laurie:

Attached are two PDF's. The first is a letter responding explicitly to the questions Mr. Hunter posed in his email message. The second is a copy of the most recent Drainage Report reviewed by Stantec on behalf of the Town and referred to in my responses.

I regret that somehow the Millbury Assessor did not include the railroad in the Certified List of Abutters to this project. But, I have forwarded emails from four separate attempts I made to contact the railroad back in May after our first hearing in front of the Board and receiving feedback from the abutters of their dissatisfaction with the existing crossing. I got no response from the Genesee & Wyoming Railroad to any of my emails.

Nevertheless, in the absence of input from railroad staff, the Town and peer reviewer have been considerate of the interests of the railroad including requiring fencing at the boundary where there is none now and confirming that there will be no drainage discharge onto the railroad property.

If you have any questions, please contact me. Thank you.

James
